EEMANN TECH is a distinguished leader in the world of shooting sports and firearm accessories.

With a legacy rooted in precision engineering and a commitment to excellence, we have earned a renowned reputation within the industry.

Our company was founded by a team of seasoned experts, each possessing extensive experience and knowledge in the realm of IPSC (International Practical Shooting Confederation), USPSA (United States Practical Shooting Association), and shooting sports competitors. Their deep understanding of the sport, gained through active participation at the highest levels of international competitions and organizational roles in IPSC and USPSA matches, sets us apart as a trusted authority.

At EEMANN TECH, our primary focus is on manufacturing and delivering high-quality spare and tuning parts, as well as a comprehensive range of accessories designed specifically for shooting sports enthusiasts. We're proud of the quality and innovation that goes into every product, making sure they meet the high standards of the shooting sports community.

Our dedication to excellence extends beyond our products. We are committed to providing outstanding customer support, technical expertise, and a seamless shopping experience for our customers worldwide. With a commitment to quality, performance, and safety, EEMANN TECH continues to be the preferred choice for shooting sports enthusiasts and professionals alike.

Our mission

As a global mission, we are driven by enthusiasm to deliver top-quality products and professional services to customers worldwide, setting high performance standards for ourselves. We combine our passion, excellence, and commitment with advanced technology and expertise to ensure precision and top-notch quality everywhere we do.

Our goal

Our primary goal is to help competitors achieve their best results and support them in reaching international success on their path to excellence.

Cooperation

We operate on a B2B dealer contract basis with gun shops worldwide. We do not engage in retail sales; our focus is strictly on B2B transactions.

EEMANN TECH's dealership cooperation is non-exclusive. We offer equal opportunities to all interested dealers to excel in the market. Any gun shop can express their interest in becoming an EEMANN TECH dealer and offer a wide selection of EEMANN TECH products in their stores to meet the needs of their customers.

If you are interested in collaboration and wish to become an EEMANN TECH dealer, please complete the Contact form to send your inquiries or requests to us on our website.

As a dealer, you will gain access to our extensive EEMANN TECH product line, as well as products from other brands we distribute. You will be among the first to receive updates, and your company will be prominently featured as an official dealer on our website and other social media channels. We are always open for cooperation and ready to answer any questions you have!

We offer a wide selection of tuning and factory-power springs for the most popular pistol models used in IPSC and USPSA shooting sports

including 1911/2011, CZ, Glock, Tanfoglio, Sig Sauer, Beretta, Benelli, Grand Power, Phoenix, AR-15/AR-9 PCC, and many others.

SPRINGS

Competitors can personalize their shooting gear with EEMANN TECH parts to meet their specific needs according to the division rules. We have all the necessary components for your handguns to match factory settings or customize them extensively with EEMANN TECH tuning springs and parts.

Thanks to advanced technology, our springs have an extended service life.

Eemann Tech Progressive Recoil Spring for 1911/2011

A wide selection for every preference

Eemann Tech Progressive Recoil Spring

The Eemann Tech Progressive Recoil Spring for 1911/2011 differs from the factory recoil spring in distance between coils. The progressive recoil spring coils are constantly reducing from the center to the end of the spring. The first part of the spring has standard factory coil gaps and is the strongest part.

The part with the “factory” coil gap starts compressing first and after the first coils impact the second part with “progressive” coil distance, they join together for faster recoil reducing to zero. At the end of the compression cycle, the progressive recoil spring’s power is ~10% greater than the declared value. As a result, if you use a weaker spring, the springs capacity remains the same.

Every spring’s power value is indicated by a unique color, that allows identifying the spring’s original power at any moment of its life. The Eemann Tech Progressive Recoil Springs are painted by a special polymer paint with thermal treatment, which remains elastic throughout the life of the spring. There are

special calibration packs for different types of handguns / IPSC divisions. Every calibration pack contains 4 springs of different power, for more precise calibration of the handgun for individual types of ammunition.

For maximum efficiency, it is recommended to use the Eemann Tech Progressive Recoil Spring with Eemann Tech Recoil Buffer (Reference code: ET-303011).

The Eemann Tech Progressive Recoil Spring has power selection from 6-18 lbs. This variety of spring power values allows them to be used with any type of handguns from OPEN division (6-7 lbs) to the Classic Major .45 caliber and factory ammunition with a light bullet (18 lbs).

When installing the Eemann Tech Progressive Recoil Spring, the strengthened part of the spring should be directed towards the chamber.

Eemann Tech Competition Springs Kit For GLOCK GEN5

EEMANN TECH COMPETITION SPRINGS KIT FOR GLOCK GEN5

Reference nr.

ET-121026

- ↳ ET-121003
- ↳ ET-121020
- ↳ ET-121005

The Eemann Tech GLOCK GEN5 Competition Springs Kit contains:

- ET-121005 - Eemann Tech GLOCK Competition Firing Pin Safety Spring for Glock Gen5 (Reduced power) - lightens the work of the trigger mechanism.
- ET-121020 - Eemann Tech Competition Trigger Spring for GLOCK Gen5 - This spring helps you to pull the trigger easier.
- ET-121003 - Eemann Tech GLOCK Firing Pin Spring for GLOCK Gen3/4/5 4lbs (Reduced power) - lightens the work of the trigger mechanism.

NOTE: We cannot guarantee that the trigger safety will function correctly after installation of the whole kit, as the kit contains a competition spring.

The Eemann Tech GLOCK Competition Springs Kit allows you to lighten the trigger pull weight of your GLOCK GEN5

The GLOCK trigger pull weight is determined by spring weight and glock connector.

A close-up, artistic photograph of various firearm components. In the upper left, a portion of a handgun slide is visible, showing its textured grip and internal mechanisms. Scattered around and below the slide are numerous coiled springs in various colors: red, orange, green, blue, purple, and silver. Other small metal parts, including what appears to be a trigger guard and a magazine, are also visible. The background is dark and textured, possibly a workbench or a display surface. The lighting is dramatic, highlighting the metallic surfaces and the vibrant colors of the springs.

Eemann Tech produces
standard and tuning parts
for the most popular
handguns, shotguns, and
rifles amongst Practical
Shooting competitors:

1911/2011, CZ, GLOCK, Sig Sauer, Sphinx,
AR15 and other firearm models and
types.

We make spare parts of excellent quality, exceeding the quality of factory-made standard parts.

We pay special attention to the tuning parts. While developing parts we use the long-term experience of the best Practical Shooting competitors around the world. All parts are made of high quality materials using modern and advanced technology.

Every competitor is able to customize their shooting equipment using the Eemann Tech parts according to their needs and division. We have everything for making handguns meet the factory parameters using Eemann Tech classic-line spare parts or make them highly customized by using the Eemann Tech

tuning-line parts.

We produce trigger mechanisms, enhanced slide stops and thumb safeties; sport extended magazine catches, front and rear sights; main, trigger, sear and recoil springs, recoil spring guide rods and many other parts that are needed and wanted among the competitive shooters all over the world.

All parts are labeled and packed accordingly.

GUN PARTS

All Eemann Tech parts are fully CNC-machined (MIM FREE).

EEMANN TECH SLIDE STOP WITH THUMB REST FOR 1911/2011

Reference nr.	Color
ET-111295	Black
ET-111296	Silver

Eemann Tech Slide Stop with Thumb Rest is made from one piece of carbon steel and CNC machined to the highest standards.

It is designed to be used with 1911/2011 firearms and their clones.

Advantages:

- No firearm modification required
- No fitting required and instant installation
- Provides stability and consistent grip for recoil control
- Slide stop thumb rest functions as a normal slide stop allowing slide to lock back if required
- When installed, fits in the IPSC Standard gun box
- Legal in IPSC Standard and Open divisions, Fits in IPSC Standard Box

Total width: ~37,5mm (1,475")

Thumb rest width: ~12,95mm (~0,5")

Weight: ~22 g

Eemann Tech Thumb Rest Slide Stop For Colt 1911, 2011 and clones.

Material: Stainless Steel

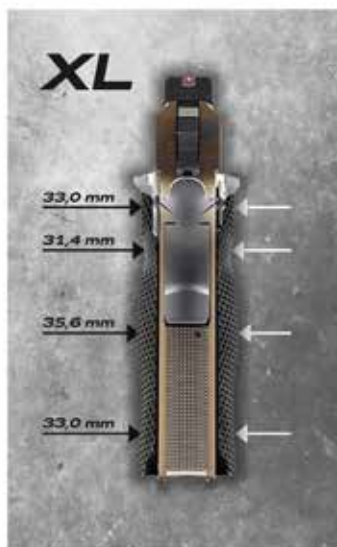

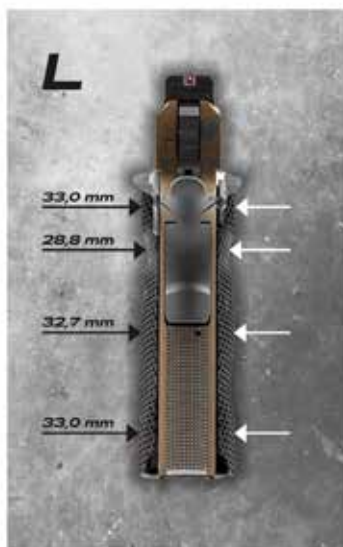

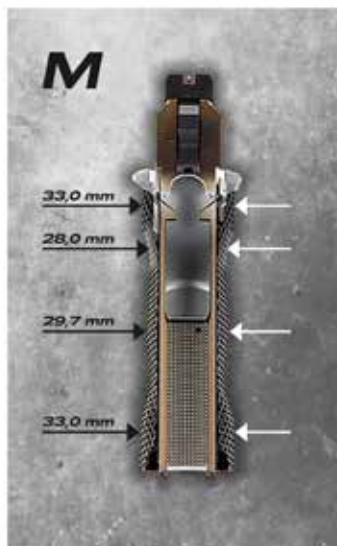

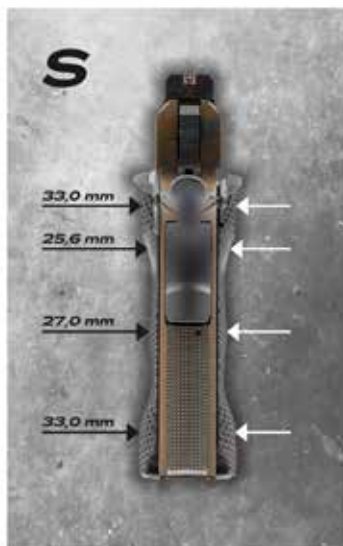

Caliber: All

All the EEMANN TECH parts for Colt 1911, STI 2011 and their clones are made from high quality carbon, alloyed or stainless steel using technologies and CNC machines of new generation.

Eemann Tech Ultimate Aluminium Long Grips for 1911

Crafted from high-quality aluminum, the Eemann Tech Ultimate Aluminium Long Grips for 1911 and their clones offer exceptional durability and a balanced, weighted feel for superior handling and control.

Material: Aluminium

Set contains:

- 1 x Aluminium Long Grip Left
- 1 x Aluminium Long Grip Right

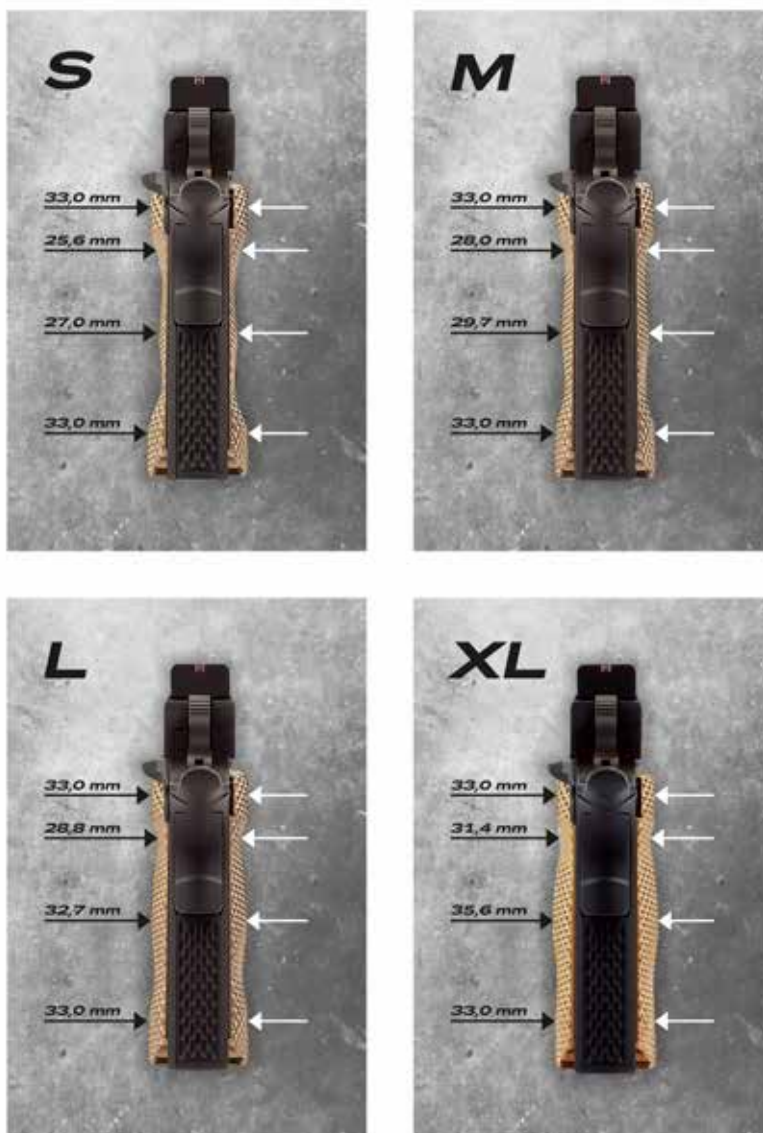

Available sizes:

Small - thickness: 3,9 mm
Medium - thickness: 5,3 mm
Large - thickness: 6,7 mm
Extra Large - thickness: 8,26 mm

Weight:

Small - 50 gr (1 pc) / 100 gr (2 pcs)
Medium - 57 gr (1 pc) / 114 gr (2 pcs)
Large - 63 gr (1 pc) / 126 gr (2 pcs)
Extra Large - 70 gr (1 pc) / 140 gr (2 pcs)

Eemann Tech Ultimate Brass Long Grips for 1911

The Eemann Tech Ultimate Brass Long Grips are precision-engineered for 1911 pistols, constructed from high-quality brass to deliver enhanced control and stability through added weight.

Material: Premium Brass

Set contains:

- 1 x Brass Long Grip Left
- 1 x Brass Long Grip Right

Available sizes:

Small - thickness: 3,9 mm
 Medium - thickness: 5,3 mm
 Large - thickness: 6,7 mm
 Extra Large - thickness: 8,26 mm

Weight:

Small - 100 gr (1 pc) / 200 gr (2 pcs)
 Medium - 113 gr (1 pc) / 226 gr (2 pcs)
 Large - 126 gr (1 pc) / 252 gr (2 pcs)

EEMANN TECH SLIDE STOP WITH THUMB REST FOR CZ SHADOW 2 - BLACK

Reference nr.	Color
ET-130050	Black

Advantages:

- No firearm modification required
- No fitting required and instant installation
- Provides stability and consistent grip for recoil control
- Slide stop thumb rest functions as a normal slide stop allowing slide to lock back if required
- When installed, fits in the IPSC Standard gun box
- Legal in Standard and Open divisions
- Not legal in IPSC Production division

Compatible with:

- CZ Shadow 2
- CZ Shadow 2 Compact
- CZ 75D Compact
- CZ 75 Tactical Sports
- CZ P01

Installation:

Remove the existing slide stop and replace it with the Eemann Tech slide stop with thumb rest.

Color:

Black

Specifications:

- Total width: 41.5mm
- Thumb rest width: 11mm
- Weight: 13g

- Extra Large - 125 gr (1 pc) / 250 gr (2 pcs)

Eemann Tech Brass Long Grips for CZ 75, CZ 75 TS, CZ SHADOW 2

Made from brass, these grips increase the weight of the pistol, improving balance when shooting. They are attached using factory screws, with a spare set provided. To prevent the grip panels from becoming loose, it is recommended to use Blue Loctite or a mild strength thread locker.

Material: Brass

Set contains:

- 1 x Brass Long Grip Left
- 1 x Brass Long Grip Right
- 2 x Grip Tape Set (ET-130022)
- 2 x CZ OEM Grip Screw

Available sizes:

- Small - thickness: 0,8 mm
- Medium - thickness: 1,8 mm
- Large - thickness: 2,8 mm
- Extra Large - thickness: 3,8 mm

Weight:

- Small - 68 gr (1 pc) / 136 gr (2 pcs)
- Medium - 93 gr (1 pc) / 186 gr (2 pcs)
- Large - 117 gr (1 pc) / 234 gr (2 pcs)
- Extra Large - 145 gr (1 pc) / 289 gr (2 pcs)

EEMANN TECH ADJUSTABLE SIGHTS SET FOR CZ SHADOW

Reference nr.	Diameter
ET-130113	1,0 mm
ET-130114	1,5 mm

The set of Eemann Tech Adjustable Sights for CZ Shadow has been designed specifically for IPSC or Target Shooting disciplines (USPSA, IPSC, IDPA, Steel Challenge, ISSF).

This adjustable rear sight is intended only for CZ 75 SP-01 SHADOW and CZ SHADOW 2 pistols.

One click of vertical or horizontal adjusting screw corresponds approximately to 1 cm on the target at distance of 25 m (sights radius on CZ SP-01 SHADOW is 17 cm).

The height of the front end of the Eemann Tech CZ 75 Front Sight is lower than its back end for making the visible side of the sight sharper while aiming.

EEMANN TECH CUSTOM ZERO DISCONNECTOR FOR CZ SHADOW

Reference nr.

ET-130160

The Eemann Tech Custom Zero Disconnecter for CZ is a specialized component designed to enhance trigger performance. Crafted from steel and finished in black, this disconnecter offers the possibility to adjust pre-travel in single action from any distance to zero.

ONLY FOR EXPERT SHOOTERS !

Installation by a qualified gunsmith is highly recommended to ensure proper functionality and safety. Installation involves precise adjustments, potentially requiring the removal of material from side A using a file or Dremel tool until the reset mechanism starts working correctly.

Specifications:

- Material: Steel
- Color: Black
- Custom component for CZ models
- Compatible with CZ Shadow 1/2 and similar models
- Professional installation required
- Adjustable pre-travel in single action

Product Contains:

- Eemann Tech Custom Zero Disconnecter - 1 pc.
- Eemann Tech Hammer Strut Pin for CZ - 1 pc.

EEMANN TECH RECOIL SYSTEM FOR SIG SAUER P226

Reference nr.

ET-141020

Maximum available size of guide rod, possibility to change recoil spring on different power from 9 lbs - 13 lbs.

Best solution for competition and reloading ammunition.

Specification:

- Fits Sig Sauer P226
- Reduces recoil
- Quick and easy to install and remove without a gunsmith

Material: Carbon Steel, blued

Weight: 37g

Set includes:

- Steel, blued guide rod
- 13 lbs Eemann Tech Recoil Spring for Sig Sauer P226 - ET-141016

Note:

- Not legal in IPSC Production Division

EEMANN TECH COMPETITION GUIDE ROD FOR SIG SAUER P320 X5

Reference nr.

ET-145001

Maximum available size of guide rod, and possibility to change recoil spring for different power.

Best solution for competition and reloading ammunition.

Specification:

- Fits Sig Sauer P320 X5 and their models
- Adjustable recoil possibility
- Quick and easy to install and remove without a gunsmith

Material: Carbon steel, blued

Weight: 42g

Set includes:

- Steel, blackened guide rod

A close-up, diagonal view of the edge of a cardboard target. The cardboard is light brown and shows a fluted internal structure. The background is a dark, solid color.

Eemann Tech produces
different kinds of targets
for practical and other
action shooting disciplines.
The selection of Eemann Tech
targets covers IPSC, IDPA,
USPSA, ISSF, Target Shooting
and tactical disciplines.

Cardboard targets are the “expendable material” for any kind of competition from Level I to World Shoots, Club team practices, individual training, and master classes. You can never have enough targets! Eemann Tech Company produces cardboard and paper targets for indoor shooting galleries and open-air shooting ranges.

In addition to the target selection Eemann Tech offers different types of target patches.

Our patches are made of water- and frost-resistant material. Specially designed for the IPSC/IDPA and their type of targets. The 20 mm patches are meant for patching hits from handgun, rifle shots or shotgun buckshots. The 30 mm patches are meant for rifle shots starting from caliber 7.62 mm. The 40 mm patches are meant for patching hits from shotgun slugs. The range of Eemann Tech patches have a wide selection of colors, diameter and quantity per roll.

Besides the paper and cardboarded targets Eemann Tech has a selection of Self Setting Metal Plate Targets. The Self Setting Targets are made of HARDOX steel and are intended for competition and shooting practice with handgun or rifle.

All products manufactured by Eemann Tech are labelled and have original packaging.

TARGETS & PATCHES

Eemann Tech Self Setting Steel
Target, HARDOX, 200 mm

Taking **training** to the next level

THE EEMANN TECH SELF SETTING STEEL TARGET, HARDOX, 200 MM

Reference nr.

ET-040012

Technical Specifications

- Plate material: HARDOX 450 (plate)
- Plate thickness: 12 mm
- Plate diameter: 20 cm
- Height: 28 cm
- Weight: 9 kg

Set Contains

- Eemann Tech IPSC Self Setting HARDOX Steel Target
- 2-springs-set [ET-040010]
- Additional 2-springs-set with reduced power -10% [ET-040011]

Target Has Been Tested By

- Pistol at 7 meters distance (calibers: 9×19; 7,62×25; .38 SUPER)
- Rifle at 100 meters distance (calibers: .223 REM; 7,62×39; .308 WIN; 7,62×54R)

Steel Targets

The Eemann Tech IPSC Self Setting HARDOX Steel Target made of HARDOX steel for competition and practice shooting using handgun or rifle.

The plate rises by means of special springs that can be easily removed if needed. The speed and rigidity of rising the plate backwards depends on springs power.

To maximize the training effect and have the plate rise back again to the standing position after each shot the plate should be used as it was designed with springs set mounted. To satisfy shooters with different firearm power factor the self setting plate set contains different power springs to provide the option for customization, to meet your needs and expectations. Using the Eemann Tech Self Setting Steel Target will take training to the next level!

To use the plate for IPSC competitions the springs can be easily removed and the plate will work as a normal falling plate.

The self setting plate has a heavy base made of steel that keeps the plate in place whilst shooting. To fix the plate in place reliably the special holes are perforated on the horizontal parts of the plate base. Using the securing holes, the plate can be either fixed on the ground in the vertical position or secured to some stable construction downwards.

EEMANN TECH IPSC MINI POPPER

Reference nr.

ET-040020

Technical Specifications

- Popper material: Steel S355
- Mounting base material: Steel S355
- Popper thickness: 10 mm
- Popper diameter: 200 mm
- Height: 55 cm
- Nett Weight: 11.9 kg
- Gross Weight: 12.5 kg

Set Contains

- 1 x Eemann Tech IPSC Mini Steel Popper
- 1 x Adjusting Bolt
- 1 x IPSC Mini Popper Assembly Kit ET-040014

Mini Popper

The Eemann Tech IPSC Mini Popper is made of steel and designed to be stable when using it on a hard surface, on the ground, or in indoor shooting ranges. It can be used for IPSC, USPSA and IDPA for both handgun and shotgun competitions and training. Not recommended for rifle.

The IPSC Mini Popper has a heavy mounting base made of steel that keeps the popper in place while shooting.

The popper can be secured to a stable structure or to the floor using the securing holes provided in the frame if required.

Eemann Tech Cardboard IPSC Target, TAN/WHITE, 100pcs

EEMANN TECH CORN COB POLISHING MEDIA M16 - 2 KG

Reference nr.

ET-030032

High quality corn cob media which can remove grit, dirt and powder residue from your cases.

The media can be used repeatedly but should be replaced periodically for the best result. The small grain media is perfect for use in small to medium size tumblers and cleans even the smallest recesses of case rims and primer pockets.

Works great with all polishing additives. Just a few spoons onto the media and then a few hours in your tumbler – and your brass will come out looking like new!

EEMANN TECH STAR CHAMBER CLEANING PADS FOR AR-15 - 50PCS./PACK

Reference nr.

NEW

EEMANN TECH STAR CHAMBER CLEANING PADS FOR AR-15 - 10PCS./PACK

Reference nr.

ET-030041

NEW

When cleaning the chamber of your modern sporting AR15, normal patches are simply not made for this job.

The Eemann Tech Chamber Cleaning Pads for AR15 are precision cut to easily fit into your bolt chamber.

They are specially designed for easier and faster removal of loosened carbon and help to evenly distribute solvents and lubricants.

Compatible with most standard cleaning rods.

Includes 10 wool chamber pads per pack.
